

Case Study

Darley Abbey Mills

Business Challenge

Darley Abbey Mills are a collection of historic mill buildings dating back to the late 1700's.

The buildings have been sympathetically restored to create highly individual workplaces available to rent as offices, studios, showrooms, workshops and galleries.

The mills have a unique atmosphere and combine the heritage of the past with the modernity required for businesses of today.

The tenants had been struggling with their legacy services, using copper-based broadband services with speeds of less than 5Mbps.

Over the last 8 years, we have helped to manage and develop this site, originally installing a Gigabit circuit and expanding our own fibre network, now serving over 35 tenants.

"e-volve made the process of getting an excellent service suitable for my business very easy, billing is straight forward and cost effective, the team have always been approachable and easy going."

Results

Our solution now gives them access to 21st Century products and each tenant now benefit from the following:

- Gigabit Circuit installed now serving over 35 tenants.
- 24/7/365 UK support
- Guaranteed, unlimited, uncontended, fibre internet circuit
- Fully managed hardware
- Fully hosted voice solution
- The installation has improved the business' day to day business activity

The e-volve Solution

e-volve are an independent internet and voice service based in Darley Abbey, Derby and have been supporting local businesses for over 12 years.

Working with selected partners, we provide bespoke solutions, addressing primary service issues, Darley Abbey Mills was one such customer.

Working with the previous Gigabit Voucher Scheme and our infrastructure partners, Nexsis Comms, we have installed a gigabit (1000Mbps) internet connection with a full fibre network across the entire site and surrounding residential locations.

In addition, we are providing fully managed routers, wireless solutions and hosted voice services, replacing existing analogue products.
